Facility Sharing in Life Sciences

Wallonia, Technological Excellence

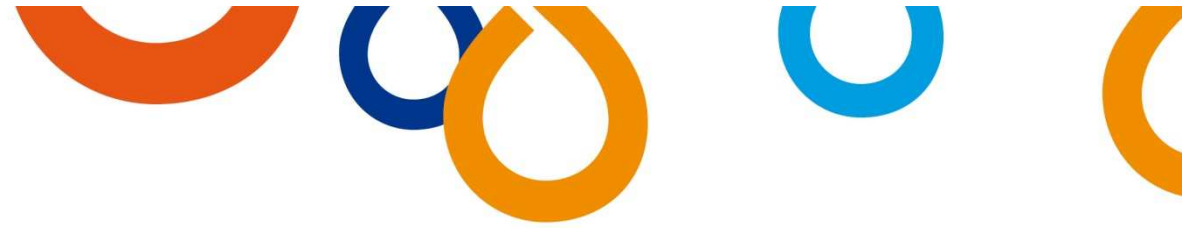

Stéphanie Querrière, Julie Marlier, Project Developer

Interface Entreprises-Université de Liège
Espace Eurêka - LIEGE science park
Avenue Pré-Aily, 4 | 4031 Liège - Belgium

Fax +32 4 349 85 20
www.interface.ulg.ac.be

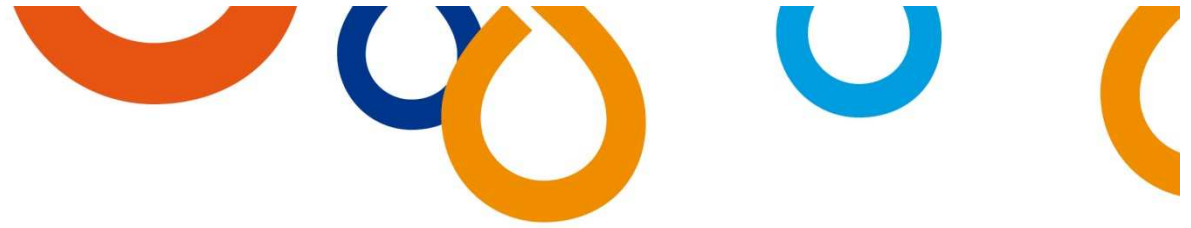

A major European crossroads...

- 9 university centres
- 30 research centres
- 6 university science parks dedicated to cutting edge technologies
- numerous approved shared research centres
- a wide "centres of excellence" network.

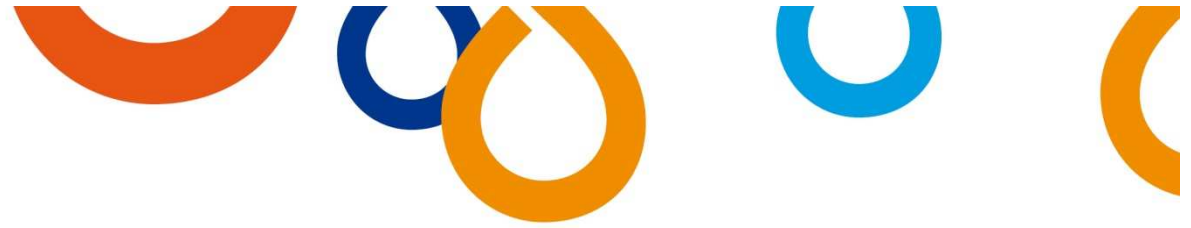

To meet all your needs...

- Health
- Advanced Materials
- ICT
- Engineering
- Etc...

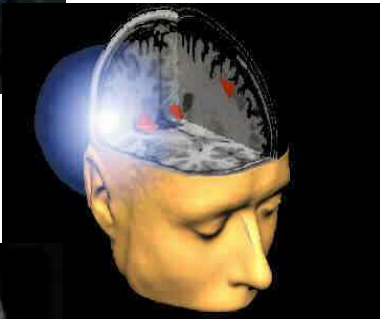

**...a few
examples:**

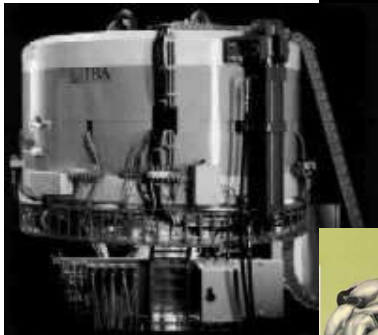

The Cyclotron Research Center (CRC)

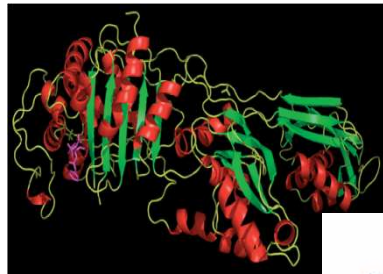

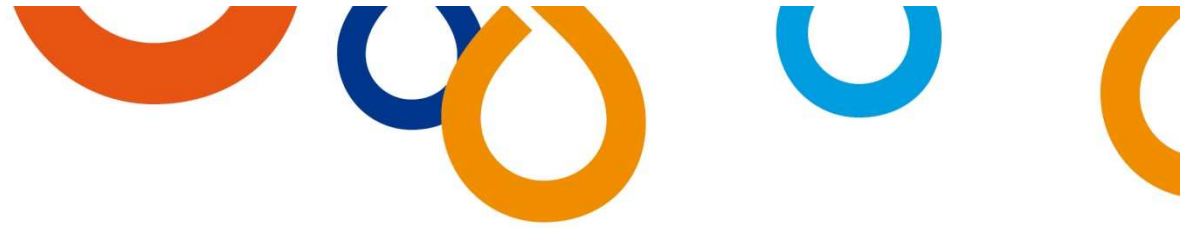

*Specialized in Functional Neuro-imaging
Techniques*

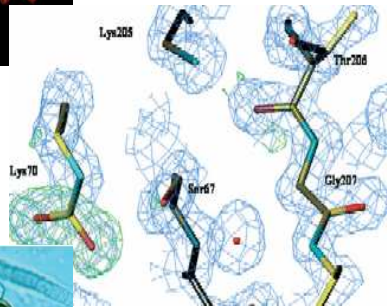

Offering services in :

- GMP Production of radiopharmaceuticals for human use (clinical study, Phase 1 / 2)
- Positron Emission Tomography (PET)
- Electroencephalography (EEG)
- Transcranial Magnetic Stimulation
- 3-Tesla functional Magnetic Resonance Imaging (fMRI)

The Center for Protein Engineering (CIP)

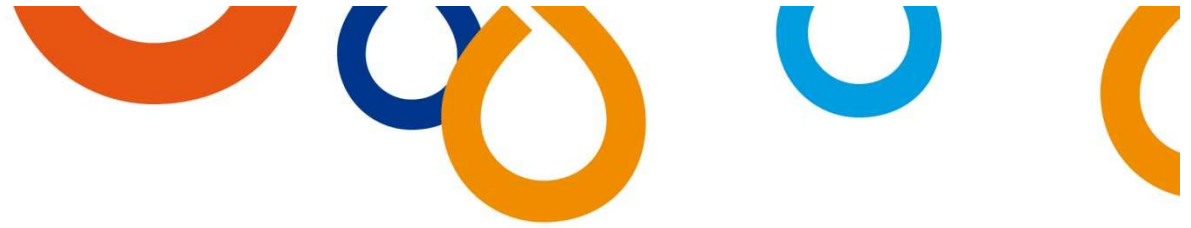

Specialized in structure determination and functional properties analysis.

Offering services in :

- Cloning / Production
- Protein purification at analytical, large or pilot scales
- Protein characterization
- Practical formation on microbial cloning, microbial fermentation and protein purification

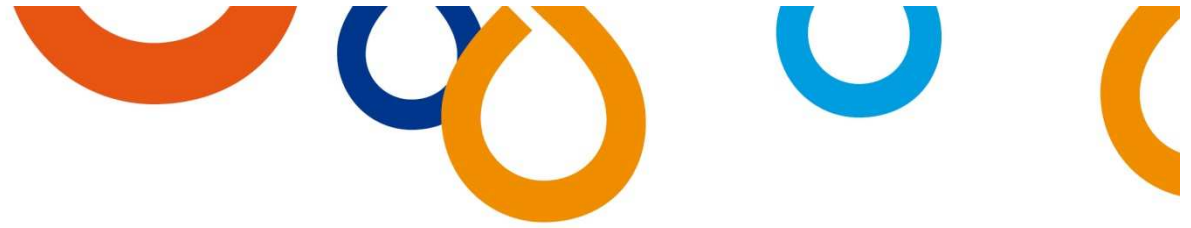

Sirris , the Collective Centre of the Belgian Technological Industry

Specialized in finding solutions to the common technological challenges.

Offering services and expertise in :

- Prosthesis and implant direct fabrication
- Realization of prototypes for functional validation
- Production of nanoparticles for specific applications
- Micromanufacturing : Integration of intelligence in products
- BioManufacturing
- And more...

Interdisciplinary Cluster for Applied Genoproteomics (GIGA)

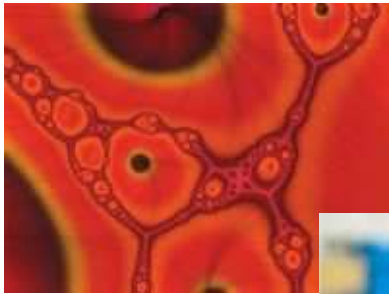

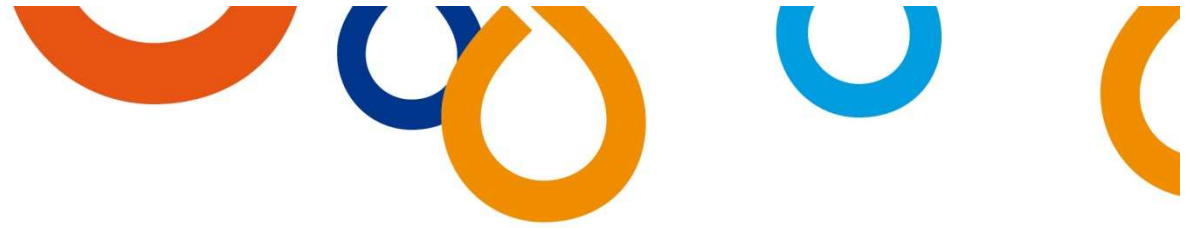

Composed of Seven top-notch technology platforms

Offering numerous services in :

- Genomics / Transcriptomics
- Proteomics
- Imaging & Flow Cytometry
- Bioinformatics
- Transgenics & Mouse / Zebrafish facilities

The Interfaculty Biomaterials Centre (CEIB)

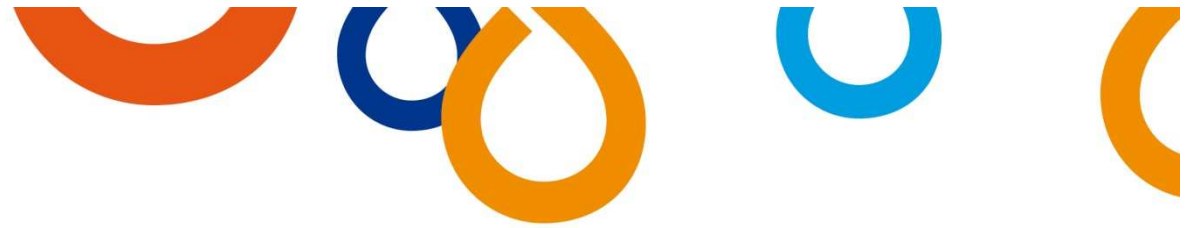

Specialized in Biomaterials and Drug Delivery

Offering services in :

- Tissue engineering for tissue reconstruction
- Polymer synthesis and processing
- Micro and nano-drug delivery systems
- Formulation optimization
- In vitro testing
- Preclinical testing
- Analytical services

And much, much more...

So, feel free to ask us.
